

# Trebuchet Group Name

Group Members Names

# What skills did your group learn during this project?

Each team member should speak during this slide.

Be specific and provide details.

Were any skills difficult for you to learn?

# How did building the trebuchet compare to your blueprint?

Each team member should speak during this slide.

Be specific and provide details.

What changes did you have to make to your trebuchet? Why?

# Reflection

Each team member should speak during this slide.

Be specific and provide details.

How has this experience helped you understand the engineering process?

What connections to quadratic functions can you make?

What advice would you give to groups completing this project next year?
